Subject: RE: Follow up on Cuyahoga Gorge Sediment Elevation Info

Can we do 12 ET (11 CT)?

Yes, please copy everyone except Marc Mills/EPA

Cheers!

Bill

Hi Bill,

I can send out a call in number for anytime today except 1-3 ET. Let me know what works for you. And should I include everyone on the email distribution?

Thanks,

Lisa

Message received from outside the Battelle network. Carefully examine it before you open any links or attachments.

Good morning Lisa – Thank you for sending the files you found. I'll have my team to look at the files this morning to determine if it is what we were requesting (I think it is) and let you know when they would be available for a call this afternoon. I'll get back to you as soon as I can.

Cheers!

Bill

Thanks Lisa. I'm looping in Bill Andrae from Jacobs. Bill – can you reply all with some options for when you (or whoever is most appropriate) are available for a quick call with Battelle tomorrow? It'll probably only be a 5 or 10 minute conversation.

My day is almost entirely booked with meetings, so you guys go ahead and pick a time that works for you, and I'll call in if I can.

-MB

Hi Mary Beth,

As we discussed, we can get you the information your contractor is looking for. However we have a couple of questions. I've summarized them below. It might be good to get on the phone briefly tomorrow to discuss. Let me know and I can set up a call.

- The electronic XYZ data (*.xyz file or *.txt file) of the interpolated sediment and bedrock surfaces in elevation format – we can provide this.
- Electronic data input files used to create the interpolated sediment and bedrock surfaces - will also need a shoreline bounding polygon as the surfaces do not end at the shoreline but rather are clipped by the shoreline in the 3-D image.

- Depth equivalency (i.e., 0 ft below sediment surface (bss) = XXXX elevation) - not sure what this is revering to...is this bathymetry? How would this be different than the interpolated sediment surface as indicated above?
- Confirmation of the horizontal and vertical datums of data - there is some uncertainty as to the vertical elevation datum. Jacobs may have a better feel for this and it would be good to discuss with them.

Thanks,

Lisa
